SPELL

You can use the Spell program to check the spelling of words, search for anagrams, to find missing letters to help solve crossword clues, and search for synonyms using the thesaurus. You can also use the [Paste](#) command in Spell to insert words 'copied' in other programs into the box, and 'copy' the corrected word back into the other program. Refer to the 'Word' document for more information on checking the spelling of text in the Word program.

Displaying on-line help

To display on-line help, select the [Help on Spell](#) option from the [Tools](#) menu.

Spell-checking and correction

- **To check the spelling of a word:** type a word in the box and tap the [Spell](#) button, or select the [Spell check](#) command from the [Tools](#) menu.

If Spell finds the word you entered in its dictionary, it displays a message to tell you that the word is correct. If the word is not in the Spell dictionary, Spell searches for possible alternatives and lists them as they are found.

You can clear the display to remove the suggested solutions using the [Clear display](#) command on the [View](#) menu.

You can also use the  button to display the "history list" which contains the words you have used in this Spell session.

Using the thesaurus

You can use the thesaurus to search for synonyms, i.e. words that have the same or a similar meaning to a word you enter.

- **To use the thesaurus:** type the word in the box and tap the [Thes](#) button, or select the [Thesaurus](#) command from the [Tools](#) menu.

If there are suitable words, Spell lists them as they are found. Spell divides the synonyms into categories, each category relating to a different meaning of the entered word, with the main suggestions in bold. The words are separated into groups, e.g. adjectives, nouns, verbs etc.

You can select any word from the list of suggestions to look up again. To do this, tap on a word to highlight it, and then tap again to select it. You can also select a word from the list, then use one of the Toolbar buttons straight away.

Solving anagrams

You can use Spell to search for anagrams of words or letters. An anagram is a word that has some or all of the letters as another word, arranged in a different order. For example, anagram suggestions for 'angle' could include 'glean', 'angel', 'lane' and 'age'.

- **To search for possible anagrams of a word:** type the word in the box, tap the [Anag](#) button, or select the command from the [Tools](#) menu.

Spell lists possible anagrams as they are found. Spell lists the words in order of size, starting with the longest words it can find. If Spell doesn't find any anagrams, it displays a message to tell you that no solutions were found.

Finding missing letters - Xword

To find missing letters to help solve crossword clues:

1. Type a word in the Word text box, entering '*' or '?' in place of the unknown letter(s). Enter '*' to search for several replacement letters, or '?' to search for one replacement letter.

For example, if you enter 'For*ed' suggestions include 'Forced', 'Foresighted', and 'Foraged', alternatively if you enter 'For?ed' the suggestions include 'Formed', 'Forked' and 'Forced'. You can enter '*' or '?' more than once when looking for missing letters, for example if you entered 'F?r?ed' the suggestions would include 'Forced' and 'Farmed'.

2. Tap the [Xword](#) button, or select the [Crossword](#) command from the [Tools](#) menu.

Adding words to Spell

Spell has two dictionaries it uses when checking the spelling of words:

- The **Spell** dictionary, which contains the built-in words. The Spell dictionary is always used when checking a word.
- The **Personal** dictionary, which you can use to add other words that you want to keep in Spell, e.g. if you use a specialised vocabulary for your work.

You can use the Personal dictionary in addition to the Spell dictionary. You can view the contents of the Personal dictionary, and delete words if they are no longer required, or if you added them by mistake.

- **To use the personal dictionary as well as the Spell dictionary:** select the [Use personal dictionary](#) command from the [File](#) menu. This setting is saved when you close Spell, and also applies when spell checking words in other programs, e.g. when spell checking a Word document.
- **To add a word to the Personal dictionary:** type the word in the box, then select the [Add word](#) command from the [Personal dictionary](#) cascade on the [File](#) menu.
- **To view the contents of the Personal dictionary:** select the [Show contents](#) command from the [Personal dictionary](#) cascade on the [File](#) menu. This makes it easier for you to remove unwanted words, especially if you can't remember all the words you have added to the Personal dictionary.
- **To delete a word from the Personal dictionary:** show the contents of the Personal dictionary (as described above), highlight the word you want to delete and select the [Delete word](#) command from [Personal dictionary](#) cascade on the [File](#) menu.
